

Developing proposals

We'd like to thank everyone who took part in our public consultation in 2021. Since then, we have:

been carefully considering more than 900 responses received

carried out further surveys, traffic impact and environmental assessments

refined our proposals with local people and communities in mind

We are now consulting on some of these changes.

You can find out more about the 2021 statutory consultation in the *Public consultation summary report*. Or you can see an overview of the feedback received and our response in our *Responding to feedback from 2021 public consultation booklet*.
